

FOR IMMEDIATE RELEASE OR FOR SUMMER TRAVEL FEATURES

SleepPhones offer solution for weary traveler's vacation fatigue

Vacations are always fun, but they can also be draining, especially if the traveler cannot get enough sleep due to being on a plane or in a strange bed in a hotel. SleepPhones, the combination soft headband/headphones designed specifically for sleeping, can help vacationers get enough sleep whether in the air or in a bed.

The soft, comfortable fleece headband houses thin speakers which fit snugly over the ears, blocking air passenger and hotel noise and enabling the user to fall asleep to music, nature sounds, etc.

In addition, the SleepPhones web site offers mp3 downloads of binaural beats that help induce relaxation and drowsiness, a perfect thing to play on SleepPhones. And since the speakers are removable, vacationers can throw SleepPhones in the washing machine to clean them when they get home.

"SleepPhones allow you to drift off to sleep via your favorite soothing sounds instead being kept awake by noisy hotel neighbors or airliner noises," said Dr. Wei-Shin Lai, CEO/founder of SleepPhones and family doctor. "Being well-rested makes a vacation more fun, so SleepPhones are the perfect travel accessory."

About AcousticSheep, LLC

AcousticSheep, LLC designs and distributes innovative headphones for a variety of lifestyles. Formed in 2007 by a family doctor and her husband, AcousticSheep products are designed with comfort, quality, and the environment in mind. Headquartered in Pennsylvania, the company is powered by 100 percent wind energy. Visit SleepPhones.com for additional information.
