Letter from the Founder and CEO

Seven years ago, I invented SleepPhones® when struggling to fall asleep after late night emergency phone calls from patients. As a doctor, I quickly realized that my (now patented) headphones in a headband were revolutionary, not just for me but for millions of people who have insomnia, a snoring spouse, a noisy apartment, a habit of watching TV to fall asleep, travel frequently, listen to audiobooks, or simply enjoy music in bed. Our customers write in about how they’ve come off of sleeping pills or stayed in a marriage because bedtime disagreements were resolved.

SleepPhones sales took off! I am fortunate enough to have dedicated, exceptional employees and talented advisors helping us sell a phenomenal product that’s really making a difference. Please see the next page for our sales chart.

RunPhones® were a natural evolution of the product. When customers told us they were wearing SleepPhones for walking the dog, shoveling snow, or working out, we decided to make a lightweight, moisture-wicking headband with the same electronic components inside. RunPhones stay on comfortably, unlike ear buds. They improve safety by letting in some traffic sounds. This product line grew the fastest in 2014.

Over the years, we have continued to improve and innovate. We just won the 2015 International Consumer Electronics Show Design and Engineering Innovation Award for SleepPhones® Effortless in the headphones category. This marks the third year in a row that our products have won a CES Innovations Award. I’ve also won several other prestigious awards including the Governor’s Impact Award (twice!) As you know, wearable technology is the latest buzz in consumer electronics. We are positioned perfectly for tremendous growth.

It’s thrilling to lead my company to more successes and leaping forward with creative innovations. And it’s even better to provide tremendously useful and health-promoting products as a small part of making the world a better place to live.

Care to join us on this journey?

Wei-Shin Lai, MD
The one and only original patented headphones
